At Sunteck, we specialize in the cost-effective design and management of third-party logistics services for raw materials and manufactured goods. Sunteck can accommodate the customer's requirement, from a simple transportation point solution to providing a full turnkey transportation management program.

As part of the Sunteck Distribution & Logistics Services solution, we enable:

- Exceptional loss prevention (zero claims loss or damage in more than three years)
- Consistent and documented on-time performance
- Proactive communication with 24/7-365 live dispatch
- Time for you to concentrate on your core competency

WHY CHOOSE SUNTECK D&L?

Why should you choose Sunteck Transport D&L?

- Financially-responsible public company with a track record of successful growth and strong credit history
- Commitment to implement and execute your distribution processes efficiently and with a personal passion to make it successful
- Top 10 rated freight broker in *Transport Topics*, with a strong history of success with a national customer base, and a sales and operations support team committed to your success
- Full visibility to shipments and real-time proof of delivery

Our goal is to provide cost savings and time-management benefits to your logistics model. Make the change to Sunteck D&L and experience the difference!

HOW CAN WE HELP YOU?

At Sunteck Transport D&L, we help customers by:

- Listening to how you are currently operating your distribution process and then executing a plan in a consultative way to build both cost and service efficiency
- Building distribution efficiencies through the utilization of more than 1425 last mile distribution facilities throughout the U.S.
- Building cost savings of up to 27% over internal fleet costs by implementing distribution through our extensive network
- Being a strong liaison to our customer's loss prevention teams to ensure product security in transit, in warehouse, and during last mile distribution
- Offering complete web-based visibility to transit updates, real-time proof of delivery, and the entire distribution process
- Providing personnel to handle all incoming live queries 24/7
- Having more than 70 years of collective last mile and supply chain logistics expertise
- Consistent on-time performance providing customers extensive savings in wasted payroll waiting for deliveries to arrive
- Giving you the ability to get freight to market quickly, providing just-in-time inventories and allowing warehouse teams to eliminate costly overtime and spread out your picking schedules more evenly
