

TRUCKLOAD SERVICES

Sunteck Transport Group began as a truck broker and has grown into one of North America's leading providers of truckload, LTL, intermodal, expedited and logistics services. We have the ability to handle the day-to-day and peak capacity requirements of shippers across the U.S. and Canada while providing superior service at competitive rates. In the truckload sector, this includes dry vans, reefers and flatbeds.

Sunteck has agreements with a performance-driven mix of independent motor carriers. The motor carrier selection process is key to Sunteck's operations. Each is scrutinized for compliance with federal safety regulations. This combination of resources enables our seasoned freight coordinators to cover and manage any freight and/or logistics need, and will be FMCSA-CSA ready.

We are committed to providing our customers with on-going, cost-effective, nationwide capacity in the full truckload sector. While we are recognized specialists in providing immediate spot quote rates, we also offer competitive, long-term rates for customers with those requirements.

Our marketing and freight management teams respond to both online and offline bid requests and customer surveys on a daily basis. Our cost estimators track market conditions, which include fuel surcharge changes, current and anticipated weather conditions, freight seasonality and regional equipment capacity availability to provide the most competitive, deliverable price and service.

Besides dry van, reefer and flatbed movements, Sunteck is also a specialist in over dimensional, heavy specialized and super heavy hauling.

- We have access to the brokered equipment and personnel needed for large-scale projects
- We offer competitive service and pricing to help bring down the overall transportation cost in your project bids
- We get special project loads moved that other logistics companies don't have the equipment or experience to handle
