SUNTECK CIO APPOINTED TO SOUTH FLORIDA CIO BOARD

FOR IMMEDIATE RELEASE

July 23, 2008 – Boca Raton, Fla. – Sunteck Transport Group, a non-asset based provider of transportation services, has announced that David A. Less, CISM, CISA, CSM, its chief information officer and vice president, has been appointed to the South Florida CIO Board.

The South Florida CIO Board was founded in 2006 by the CIO of Burger King Corporation and other South Florida IT leaders as a means to connect nearly 20 CIOs throughout South Florida. The board meets quarterly to discuss common areas of interest in the IT industry. Meeting locations are rotated among the various board members.

As an example of the Board's work, it created a program to develop future IT talent in the South Florida area, a response to the flight of good IT professionals northbound. This program was created in partnership with local high schools that have specific information technology magnet programs. Two CIOs are assigned to each high school for a multiyear partnership that develops and mentors future leaders.

Prior to joining Sunteck earlier this year, Less has 22 years of information systems, audit, and consulting experience working with global corporations. He was global director of IT audit and advisory services for CTG, Inc., a major information technology staffing, solutions and application management provider. Before CTG, Less was senior vice president of IT audit services for CBIZ HarborView, Inc, and chief technology officer and an executive committee member at HarborView Partners, LLC. Before starting HarborView Partners, he was president of DAL Consulting, which provided IT services including risk assessments, security and controls reviews, project management and pre- and post-implementation assessments.

--more--

Less' other corporate affiliations include MIS Training Institute, where he provided global IT training to all levels of management, internal auditors, and technology and audit professionals. Clients included Fortune 10 companies, the U.S. government, and major public accounting firms. The major topics for his classes included risk assessment, systems development methodology and project planning, IT controls, business application testing, client-server environment control, SAP R/3 Basis, e-commerce infrastructures, and security of e-business applications.

"I'm pleased and honored to have been selected to join this auspicious group," said Less. "I hope that my experience across many IT disciplines will help drive further initiatives on the board's behalf."

About Sunteck Transport Group

Sunteck Transport Group, the operating subsidiary for AutoInfo, Inc., is a non-asset based transportation services company, providing transportation capacity and related transportation services through its agent network to shippers throughout the United States, and to a lesser extent, Canada. Sunteck's services include ground transportation coast-to-coast, local pick-up and delivery. Sunteck has strategic alliances with less-than-truckload, contract carriers, truckload common carriers and independent owner-operators to service its customers' needs quickly and effectively.
